Re: Pre-Purchase Drug Screen  
Horse – Rebel Yell  
Client – Steven and Thora Pollak

Dear Dr. Cowherd:

CENTER FOR TOX SERVICES, INC. has completed the Pre-Purchase Drug Screen analysis of the sample submitted from the horse, "Rebel Yell" (Laboratory I.D. Number 19774). Two blood collection tubes containing a combined volume of approximately 17 ml of serum were received on July 3, 2018 via Federal Express.

An aliquot of the sample was screened for the following drugs utilizing enzyme-linked immunosorbant assays (ELISAs). The drugs included in the routine screen were as follows:

ELISA Procedures

Albuterol	Eltenac	Mepivacaine
Acepromazine	Flumethasone	Methyl Prednisolone
Betamethasone	Flunixin	Methocarbamol
Butorphanol	Fluphenazine	Pentazocine
Carprofen	Isoxsuprine	Phenylbutazone
Clenbuterol	Ketoprofen	Promazine
Detomidine	Lidocaine	Reserpine
Dexamethasone	Meclofenamic Acid	Romifidine
Diclofenac	Meloxicam	Xylazine

Based on a review of the results obtained from the ELISA screening procedures performed, no drugs were suspected in this sample.

The remainder of the sample will be destroyed fourteen (14) days from the date of this report unless written authorization is received to return the sample to your office. If I can be of any further assistance, please call.

Sincerely,

Christopher Muse  
Assistant Director
