Waived by buyer

Bloodwork waived by buyer

**"Mac"** Had no disclosed history of lameness or illness. The current owner has had him since April. He is worked 4x/week. His feet are slightly overedue for trimming and balancing. He has an old flesh wound scar over his dorsal RH canon. All flexion and hoof tester exams were negative. No signs of illness or lameness were seen during the exam. He exhibited a calm and tolerant disposition throughout the exam.

Regards,

Marc P. Laxineta DVM

**The above findings and statements are based on the clinical examination performed on this date, these findings are not a warranty of health or soundness in the future, and only reflect the condition of the horse on this date. If the buyer requires a warranty regarding future soundness, health, non-administration of medication prior to examination, exact height or weight, freedom from vices, performance ability, etc., he/she should obtain one from the seller; as these matters are not the responsibility of the veterinarian. This examination is intended to assist a prospective buyer. In the opinion of the examiner, those organ systems available for examination on this date were found to be as indicated above.**
