RE: Lil Bit Extreme aka Rip. A 7-year-old AQHA gelding owned by Stacy Abbott

To Whom It May Concern,

I have done a general exam, respiratory exam and endoscopic exam on the above-described horse and have diagnosed him with left laryngeal paralysis. This causes him to have inspiratory stridor and fatigue when exercised hard. We recommend either light work only or tie back surgery to alleviate the problem.

If you have questions or if I can be of any assistance, please contact me.

Respectfully,

Dr. Khris Crowe DVM MS PC
