Radiographic Exam

LF Fetlock: NSF

L Carpus: NSF

LH Fetlock: NSF

L Hock: NSF

L Stifle: NSF

RF Fetlock: NSF

R Carpus: NSF

RH fetlock: NSF

R Hock: NSF, smooth remodeling on the distal tibia (scar over area) not articular

R Stifle: NSF

Endoscopic Exam

Both nasal passages are clear, the upper airway has normal function, symmetry and full abduction of both arytenoid cartilages. The anatomy of the upper airway is normal, no displacement of the soft palate was noted during the exam. No blood or mucus present in the trachea.

Comments: None, horse was good to work around and sound at the walk and jog in hand.

I do not have any direct financial interest in all or any part of this horse.

This report and the findings contained herein are solely for the addressee and may not be used or relied upon by any other person or entity without the express written consent of Jamie Carter DVM. The interpretations of the radiographs/endoscopy and findings vary with the examiner, type of exam requested, method of exam and horses changing condition. This is a report of the undersigned's findings, based on the type exam requested by the addressee, on the date indicated. This report is limited to the findings contained herein and no other findings or opinions should be inferred beyond those expressly set forth herein. This report does not constitute any warranty or guarantee of any kind. This report is for the use on horses intended for public auction while meeting the requirements of repositories currently in operation. It is not intended to be all inclusive but is meant to supply a workable format of reporting.
