Is there evidence of objectionable habits? Vices?		✓
Any major conformation faults which may effect horses short or long term use?		✓
Teeth and bite clinically normal?	✓	

Please describe any **abnormal physical findings** below

The horse travels without any significant gait abnormalities. He does have a swollen right front fetlock but it does not appear to affect his soundness. He also has warts on his muzzle which should run their course.  
 No other abnormalities noted.

**OR**

No significant abnormalities noted on examination
